Cleaning Procedures and Recommendations

Here are some recommendations for routine care and cleaning:

Natural Stone:

- Granite and Marble should be cleaned with neutral or slightly alkaline cleaners (PH level 7).
- Use soft cloth on all stone surfaces when cleaning.
- Do not use products that contain lemon, vinegar or other acids on granite or marble.
- Your stone is sealed for protection upon completion of installation. If you did not choose 15 year NANO sealer at point of purchase then additional sealing is recommended every 12-18 months.

Quartz:

- Quartz can be cleaned with simply soap and water or neutral or slightly alkaline cleaners (PH level 7).
- Use soft cloth on all stone surfaces when cleaning.
- Quartz surfaces need no sealing. They are completely non-porous.

Solid Surface (Matte/Satin Finish):

- Solid Surface can be cleaned with simply soap and water or neutral or slightly alkaline cleaners (PH level 7). Ammonia based cleaners (not window cleaners) are approved as well. When disinfecting your surface, diluted household bleach (1 part bleach, 1 part water) is recommended.
- Use soft cloth on all stone surfaces when cleaning.
- Solid Surfaces need no sealing. They are completely non-porous.
